

Canadian Energy Executive Association '71
Energy Business Forum
presents:

OIL & GAS BEYOND BOOMERS 2022

Can Canadian Oil and Gas Win the Race to Net-Zero?

WEDNESDAY • MARCH 9 • 2022

2:30PM-7:00PM

CALGARY PETROLEUM CLUB • DEVONIAN ROOM

The Canadian Energy Executive Association “Beyond Boomers” Event promotes industry-changing ideas, and a vision of what energy production will look like in 2050.

This keystone event hopes to align Young Professionals, Senior Executives, Indigenous groups, and key stakeholders to challenge mindsets on not only the importance of the energy industry, but also how to enroll and engage young people in advocating for their own future in the industry.

The Canadian oil and gas industry is at the forefront of cleantech innovation, and possesses the skills and knowledge required to solve global challenges like reducing emissions.

There is much talk of transitioning off oil and gas, but what if we could transition oil and gas to net-zero. Even better, what if the industry reaches net-zero before anyone else and uses our innovations to help others.

- 2:30pm Registration
- 3:00pm Land Acknowledgement, **Ellis Ross**, BC MLA for Skeena
- 3:05pm Welcome: CEEA 71 Chairs, **Steve and Jenn Major**
